Some backgrounder info

[+]
Front

tiki.org

Tiki is a web-based, multilingual, wiki-based, content management system (CMS) with a tightly integrated set of comprehensive groupware features. Tiki is free and open source software, created by a large, international development team.

Tiki includes hundreds of deeply integrated features. Unlike other solutions, Tiki “does it all.” You do not need to find other modules or add-ons to fill in the missing pieces. With its “all-in-one” design, Tiki can easily create all types of collaborative applications: websites, portals, knowledge bases, intranets, extranets, and more. With an enormous feature set, and a web-based, administration interface, Tiki has both the features you require and the ease-of-configuration that you desire. Because of its rich feature set and active developer community, Tiki will meet all of your requirements, now and in the future.

Features

- Multilingual wiki
- Blogs and articles
- Forums
- Calendars and events
- Database tracking system
- File and image galleries
- Advanced user and group management
- Search engine
- Forms and database tracking system
- Plug-ins for YouTube, MySpace, Google Analytics, Google Docs, Skype, Twitter, Facebook and many more
- FAQ section
- Advertisement banner management
- Mobile version
- Spreadsheets
- Live support chat
- User message system
- Advanced menu management
- Content and feature access control and permission system
- External authentication support (such as LDAP, OpenID, CAS, and more)
- RSS generation and syndication
- WYSIWYG and wiki editing
- Surveys, quizzes, and polls
- Category and group transitions (workflow)
- Advanced multilingual capabilities
- Unlimited category system
- Email (POP, IMAP and SMTP)
- Drawings

Preconfigured Solutions

To get started quickly, Tiki includes predefined solutions called profiles. These profiles are complete setups, fully configured, ready for immediate use. Because these Tiki profiles are community-based, you can even create your own profiles, based on your customized configurations, to share. Examples of Tiki profiles feature include:

- Corporate wiki / Intranet / Extranet
- Corporate website
- Knowledge base / Bug tracker
- Project management
- Community portal
- Workflow and specialized web applications
- Application forms
- Multilingual collaborative glossary

New profiles are continually added in an open, collaborative way. To learn more about Tiki profiles,
visit profiles.tiki.org.

Technical specifications

Tiki is designed to be run easily on readily available web hosting technology. It is built using the following technologies, chosen to provide a powerful and proven foundation for the system:

- PHP
- MySQL
- Zend Framework
- jQuery
- Smarty

Back

Tiki Timeline

Since its initial release in 2002, Tiki has seen substantial growth with more than 900,000 downloads and countless more installations through one-click hosts.

Recent highlights:
2007 Tiki listed in EContent's Top 100
2009 Adoption of six-month release cycle and Long Term Support (LTS) version
2009 Formation of the Tiki Software Association

The current version is Tiki 7.0, released in June 2011. The current Long Term Support (LTS) version is Tiki 6.3, released in April, 2011.

By the numbers

- 10+ years old
- 40+ languages
- 250+ code contributors (via CVS/SVN)
- 1,000+ built-in features and preferences
- 1,500+ wiki pages of documentation
- 1,000,000+ downloads
- 1,000,000+ lines of code, with a code commit every two hours on average

The Tiki model

- Open Wiki community
- Wiki way participation to the code
- Scheduled releases (two major releases per year)
- All-in-one codebase
  - Inherent synchronized releases
  - Lots of features, but no duplication
- We eat our own Dogfood

FAQ

Q Where can I download Tiki?
A info.tiki.org/Get+Tiki

Q Can I test Tiki without installing it on my server?
A Yes! Visit tiki.org/demo to access a test installation and “try out” Tiki. You can log in as an administrator and get a feel for how Tiki works.

Q Where can I see how far I can go with Tiki?
A You can review the guides (doc.tiki.org), watch the videos (tiki.org/TikiMovies) and visit some Featured Tiki sites

Q How can I get involved in the Tiki community?
A First, use and enjoy the software. Then begin contributing any way you like: answering end-user questions or suggesting ideas, translating interface text, updating the documentation, or coding new features. We are a very open and friendly community.
info.tiki.org/Join+the+Community

Q Is this really free?
A Yes, it's free and open source software, licensed under LGPL.

Q Who owns / manages Tiki?
A It's a community-managed project. You are invited to help!

Q How can I find out more?
A Visit tiki.org to find links to the documentation, a directory of of consultants, and hosting options, as well as support forums, email lists, and live chat to ask questions and obtain more information.
