  - 1st hour quick news
  - Second hour, longer topics
- Chat log
- Pages related to this one

Recording

- http://tiki.bigbluebutton.org/playback/slides/playback.html?meetingId=d55965849921585c1849af03b7a51638700d979-1361472957396

When

Thursday, February 21, 2013 at 19:00:00 UTC time (click for time zone in your city)

What

See Webinars for a detailed description.

Where

http://live.tiki.org

Topics

1st hour quick news

- Explain the rationale for the new Webinar format
- Should we ask for a conference call with SF about Migrate to Allura? (Jyhem will follow-up with SF)
- 2013-02-05: Pascal, Marc, Alain, Duane and Nick met Fred and the BBB Team in Ottawa. The upcoming version is looking very good. We agreed to organize a TikiFest BigBlueButton in June 2013, and make use of all the new features
- Quick report on TikiFestMuskoka
  - Introduce show.tiki.org
    - Karen asks: "quick question: do we still want the 'perpetual' showcase Tikis I've made available @ http://tikishow.kstingel.com?"
      - Until the new infra is ready, yes please.
- CKEditor4 has been added to trunk
- (add any topics here)
Second hour, longer topics

- Discussion about CKEditor4

Chat log

Karen Stingel: Hi Geoff, I'm very happy to see you! It seems like it's 5 AM tomorrow here in the U.S., so I think it's a good time for us to catch up.

Jeff Black: Hello, I'm just hopping in for a brief moment to say hello and listen in.

Karen Stingel: Hi all! I'm in listening mode.

Marc Laporte: From me.

Karen Stingel: ...and then you'll need to leave in an hour.

Karen Stingel: Quick question: do we still want the 'perpetual' showcase Tiki's I've made available at http://tikishow.kstingle.com?

Marc Laporte: OK, I will add to the list for later.

Karen Stingel: I haven't seen any Allura problem so far recently.

Marc Laporte: Seems like you're just looking to commit fixes and stuff.

Karen Stingel: How long does it take to fire up a Tiki instance, to report a bug?

Marc Laporte: Fire up of the instance should be pretty quick, 1-2 min.

Karen Stingel: How many simultaneous 'test instances' can be run?

Marc Laporte: That would of course not reproduce a 'conflict of two features' bugs...

Marc Laporte: Not really today.

Karen Stingel: Why not.

Marc Laporte: People are not mailing lists, just aliases/forwarders distributed to several people.

Karen Stingel: And even though they are not mailing lists, just aliases/forwarders distributed to several people, why release or not is not easy to do at all of time.

Marc Laporte: Because the list remains short. I'm leaving button for Quality, Security and Legal team.

Marc Laporte: Why do you have a sore throat today so resting my voice. Will be typing more than talking.

Marc Laporte: Is there a way to leave button for Quality, Security and Legal team?

Marc Laporte: I'm leaving button for Quality, Security and Legal team.

Karen Stingel: Would it be possible to 'push' bug examples to tikishow.kstingle.com so we have a perpetual copy of test instances?

Marc Laporte: For now.

Karen Stingel: At present, the show.tiki.org sites are temporary, so examples are lost ... my sites are permanent, so...
Karen: well there was always full Zend package, but now it is handled by the composer, maybe it includes more files.

Karen: b/c we need the full Zend package, or would just the libpq be better?

Karen: a being: what is a typical test workflow? does it test only code/syntax errors? or can it catch security holes, or permission/preference check missing?

Marc: sure, that would be next but lets keep it on mind maybe.

Karen: a being: is CKEditor planned to be added to composer.json, or left as an svn external?

Karen: oh the instance will not close until the bug is closed

Marc: show.tiki.org would need to be a site that lets developers reproduce the bug on a site that many developers have access to

Marc: in one and we can discuss

Marc: the different way you would go to tiki wiki page

Marc: Marc can't be heard, Jonny yet

Marc: u dropped off of listeners

Marc: i heard a few words Jonny, but did not get it.

Marc: Marc, u dropped off of listeners

Marc: nope, Marc

Marc: Nelson: which page,

Marc: Marc: One thing that could really help with better testing sites is an easier ways to copy pages, or even groups of pages from a prod to a dev site and back.

Marc: Nelson: there will be some action on the testing front to have testing...

Marc: Nelson: Marc: I have both trunk(11) and 10 - I've almost completed moving all my production sites to 9.

Marc: Nelson: One thing for front-end automated testing, in the line of Selenium: For example Selenium has a firefox plugin that allow you to do unit tests, and it outputs xml.

Marc: Nelson: Ok, brb

Marc: Nelson: good to have u back Marc!

Marc: Nelson: great, but lets keep it on mind maybe.

Marc: Nelson: +1 from me too

Marc: Nelson: I think like to push a bit further ready by say July-August or something.

Marc: Nelson: I've looked at examples in the past and they've been gone

Marc: Nelson: of course Alain's knowledge is more at the higher level, but he can help with creating test cases and so on, so long as someone else sets up the infra

Marc: Nelson: great, so you could contribute your 9.x set right?

Marc: Nelson: +1 from me too

Marc: Nelson: I would like to push a bit further ready by say July-August or something.

Marc: Nelson: Of course Alain's knowledge is more at the higher level, but he can help with creating test cases and so on, so long as someone else sets up the infra

Marc: Nelson: I've looked at examples in the past and they've been gone

Marc: Nelson: Marc, I can't hear

Marc: Nelson: Nelson: please ask that Alain (not sure who remembers him)

Marc: Nelson: Nelson: I'm not sure anybody does that anymore.

Marc Laporte: The current CKEditor 4 integration is based on the "Standard" download package. See http://ckeditor.com/blog/Intro-to-Customizing-CKEditor-4 for more info. One important passage: "The Standard package doesn't include plugins like Alignment, Font Size, Color and a few other typical buttons. Why? Because modern websites predefine those things in CSS to avoid low quality content. Users should not "play around" with formatting. Web standards are increasingly more focused on the semantic information of texts. The Standard CKEditor comes with all the necessary tools to create "good web content". The idea is teaching our users about the best way for a "better web", so we made Standard the default option."

Karen Stingel: luciash: can always leave it open in WIndown and lurk ;) just so you don’t feel alone and also possibilities for adopting zf2

Karen Stingel: luciash: doesn’t work when I’m mirroring SVNtiki to DEVtiki webroot

Karen Stingel: luciash: I’ll check that once I get back ...

Karen Stingel: luciash: I’m mainly tinkering in comments, being away doesn’t matter much."

Karen Stingel: it is really almost a not very meaningful release, jjust to increment the numbers

Karen Stingel: luciash: it is true that we shift the months cycle?

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: we made Standard the default option.

Karen Stingel: luciash: could we have even the tiki 11 star name yet ;)

Karen Stingel: luciash: I can always leave it open in WIndown and lurk ;) just so you don’t feel alone

Marc Laporte: For example this: http://ckeditor.com/builder

Luciash: luciash: I’ll check that once I get back ...

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: but since I’m mainly tinkering in comments, being away doesn’t matter much.

Karen Stingel: luciash: I’ll check that once I get back ...

Karen Stingel: luciash: I’m also trying to track any reported conflicts introduced via

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: does something special or basic tiki syntax version of http://ckeditor.com/demo#bbcode?

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: could we have even the tiki 11 star name yet ;)

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: it is true that we shift the months cycle?

Karen Stingel: luciash: how do I add topics to the Webinar wishlist?

Marc Laporte: For example this: http://ckeditor.com/builder

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues. We make more than one demo sites because the various modes are mutually exclusive and we need a place to show off issues for each.

Karen Stingel: luciash: how do I add topics to the Webinar wishlist?

Marc Laporte: Pascal will create demo.tiki.org/wysiwyg-jison-html/ and demo.tiki.org/wysiwyg-wiki/ and maybe demo.tiki.org/wysiwyg-jison-wiki/ so we can have a stable place to show off issues.
