AutoLinks

Admin Documentation

Note from Terence: *Should this page be about the wiki autolink feature or the shoutbox autolink feature? The "AutoLink" setting in Admin/Features currently affects the wiki autolink feature but not the shoutbox.*

))AutoLinks((is a Shoutbox feature. If enabled, URLs entered by users in Shoutbox entries will automatically be shown as clickable links.

Note: For some reason (by design or not, I don't know), a link clicked in this way opens in the main window, not in an iframe.

To enable this function, click on "Shoutbox" under the "Admin" menu, and click the checkbox for *auto-link URLs*, and click on the *Save* button.

Notes

This page is for version 1.8.
