

## ColorSchemeGenerator

All relevant information should be migrated to <http://themes.tiki.org>

---

Another color scheme generator found, this one is very nice:

- [http://www.steeldolphin.com/color\\_scheme.html](http://www.steeldolphin.com/color_scheme.html)

For all the template and css hackers around here is a link to a nifty Color Scheme Generator:

- <http://wellstyled.com/tools/colorscheme2/index-en.html>

Or check out a cool [color palette generator](#), that can extract palettes from images.

- <http://www.creatimation.net/extra/photopalette/index.php>

Another nice javascript tool is the [transparent png maker](#). Its a "simple" colorwheel, and there is a demo for xmlhttprequest built-in.

- <http://apps.everamber.com/alpha/>

Another colour styling tool: <http://meyerweb.com/eric/tools/color-blend/>

Also take a look at StylesList for existing themes in Tikiwiki.
