

Jeppers

We initially partnered with Jeppers to develop a Spreadsheet component to Tiki. Cameron Zemek has informed [me](#) that won't be developing Jeppers as originally thought.

Below is Jeppers related information for "historical" value.

[Jeppers](#) aims to be a full featured spreadsheet application written in 100% pure Java. Additionally it strives to provide a lightweight spreadsheet component that is flexible and reusable.

Please see: [TikiSheetDev](#)

We have forged a partnership with the [Jeppers](#) project. Here is a [demo](#)

[Stop me or give me a thumbs up please 😊](#)

Help needed

Help is needed with the following:

- Format Cells dialog (see Format->Cells... in Excel)
- Implementation of functions for cell formulas
- Logo
- End user documentation
