

## Nomad Translation System

Excerpt:

- <http://india.indymedia.org/en/2004/01/208432.shtml>

"Yesterday i got a tour of the Nomad Translation Project. The system will allow a network of grassroots translators to manage a live translation system with archiving and streaming based on free and open technology. It's a free software package written in C for linux and licensed under the GPL. It's being developed by a group of Tunisian free software hackers and being used for the first time here in Mumbai for the World Social Forum."

Something done already

- <http://www.wired.com/news/technology/0,1282,61966,00.html>

13 Languages Speak With One Voice: MUMBAI, India — The World Social Forum is speaking in 13 languages this year. And amazingly, most of the time, everyone understands what the others are saying.
