PluginCatpath

This plugin inserts the full category path for each category that the current wiki page belongs to.

```
{CATPATH( divider=>string #string that separates the categories, defaults to '>' top=>yes|no #to display the TOP category or not, defaults to 'no' )} {CATPATH}
```

Example

```
{CATPATH(divider=>|,top=>yes)} {CATPATH}
```

creates this output:

TOP | feature_(need_revision) | Wiki & html pages | WikiPlugins
