

## RegisterTikiSite

This page lets you register your site at tikiwiki.org, that means your site is added to the category [tiki sites](#) in the directory on tikiwiki.org. All you gain is an additional link to your site, no more, no less.

What we (the tiki developers) gain is an overview who is using Tiki for what. This may help us to decide which features to develop / enhance next.

### screenshot of tiki\_register\_site.php:

**Register this site at tikiwiki.org**

**Read this first!**

On this page you can make your tiki site known to tikiwiki.org. It will get shown there in a list of known tiki sites.

- Registering is voluntary.
- Registering does not give you any benefits except one more link to your site.
- You don't get any emails, we don't sell the data about your site.
- Registering is just for us to get an overview of Tiki's usage.

**If your site is private or inside your intranet, you should not register!**
