

ReleaseProcess179

That version have been released on 14 december 2004 by [mose](#)

Some new security problems has pushed the start of a 1.7.9 release.
You are advised to upgrade to the latest CVS code of 1.7.x

```
export CVSROOT=:pserver:anonymous@cvs.sf.net:/cvsroot/tikiwiki cvs login (blank password) cvs co -d  
tikiwiki-1.7 -r release_eta_carinea_rc1 tiki
```

or if you have a SourceForge developer account on the Tikiwiki project:

```
export CVS_RSH=ssh export CVSROOT=:ext:sfname@cvs.sf.net:/cvsroot/tikiwiki cvs co -d tikiwiki-1.7 -  
r release_eta_carinea_rc1 tiki
```

Security Updates

- Added exit to all header events to prevent further execution of code. [Damian](#)
- Added a check on image extension in wiki pictures to avoid php injection (see [art97](#) with details) [mose](#)

Other changes

- Removed the XHTML bottom button because it's just a rant that is not strictly exact. [mose](#)
