Topics

1st hour quick news

- We have a fully documented [Layout Templates](#) page
  - What about improving our community sites with a layout which keeps the topbar visible at all times?
    - -1 😞
- Update on results of Tiki Consultants survey and initial creative brief developed by Synergiq branding team for Tiki (Nelson)

Second hour, longer topics

- Tiki 15 with Zend2 seems to require PHP 5.5 even for the composer. Many shared hosting providers seem to provide not higher than 5.4 in their shell (at least by default .. some offer to use specific php5.5 commands) How we could tackle this issue .. it seems to affect a growing number of users.
- We could ask BBB if they would like to upgrade our BBB instance for the html5 one, in exchange for our constructive feedback.
