SandBoxDev

Status/RoadMap

- Where are we?
  - In a spamming hell
- Where do we want to be?
  - Relaxing on holidays and do not care about SandBox
- Who is working on what? (Priorities/goals/majors issues/roles)

TikiTeam

Who is working here generally? Link UserPage.

Trackers

- Bugs
  - BRANCH-1-9
    - SandBox can be saved by anonymous using tiki-editpage.php?page=sandbox **even when it's unchecked on Admin -> Wiki**
    - *Anti-Bot code doesn't work* - **fixed**
    - There's useless diff link in the notification mail when SandBox is under a watch
- RFEs
- tech support
- patches

Competition and standards

List of other products with similar/interesting/related features.

Here I would like to see some "editorial" content. How do our features compare to others?

CVS Doc section

This is where new features being developed and only in CVS are documented. When the CVS becomes RC/official release, the info in the CVS docs is transferred to update the official docs (FeatureXDoc).

Discussion/participation

How to prevent SandBox spamming?

My ideas:
- SandBox could (or should ?) have a special META tag in header.tpl to prevent indexing URLs by robots such as Google etc. because it's often misused by anonymous URL spammers to get their position high in search engines. When there will be no indexing of the page with SandBox there will be no effect and interest to put links by spammers.
- Make a White/Black list feature of domains/URLs (matching regexps ?).

luci

My ideas:
- Why not build some clones out of the tw tree so they "think" they are there and then treat their f*****g stuff ?

toggg

My ideas:
- Don't bother about spam

- Add the SandBox URL to the robots.txt file so it's not indexed.
