FOSDEM is a free event that offers open source communities a place to meet, share ideas and collaborate. It is renowned for being highly developer-oriented and brings together 5000+ geeks from all over the world.»

Jyhem has attended for 7 years in a row and confirms that it's huge, it's chaotic, it's fun, and well worth attending.

Most of everything is in English.

Why

... would we want to be there?

It's fun, there are plenty of talks about Libre/Open-Source topics, there are a lot of interesting people to meet who are active or interested in Libre/Open-Source topics, it's an occasion of getting the word out about Tiki and adopt good ideas from other projects ;-)

Plus, we could take advantage of being together for renting a TikiHouse and having a TikiFest.

What

Mike Finko did a very good presentation of Tiki and here is a link to his presentation on Tiki:
