

User Features

The **User Features** in Tikiwiki add ways for users to interact, and to customize the site for their own purposes.

User features include:

- **Page Watch** - provides for email notices of page updates or comments.
- **User Messages** - send internal messages to other users (without disclosing email addresses)
- **My Tiki** - a personal control panel and dashboard.
- **My Todo's** - create a todo list for yourself or a project.
- **My Notes** - add your own personal footnotes to pages.
- **My Files** - a little garden of files to call your own.
- **My Bookmarks** - create your own menu bar of frequently visited pages.
- **User Modules** - they can create their own, and change the site layout and theme too.
