UserAdministration

Getting Started with User Administration

Expanding the **Admin (click!)** menu in the left navigation bar, you can find a link to **Users** which will get you to the **Admin Users** screen (see UserAdministrationScreen and PermissionAdmin).

Expand this menu item by clicking the '+' sign or :: or other gizmo next to **Admin (click!)**. The specific gizmo depends on the theme you're using.
If you simply click the **Admin (click!)** menu item itself, you will go to the Administration panel instead and you cannot add/delete/etc. users there. See TikiAdminSettings for more details.
