- Feature Requests
    - Users need to be able to set their own timezone and the calendar needs to convert from UTC date and time (which is stored in the database (*no it is server time-sylvie*)) to the user's timezone. Done-sylvie
    - Each item in the calendar needs a separate reminder
    - Current reminders only go as far backward as 15 minutes. Need to go as far as 1 day
    - Need the concept of repeating calendar items. Daily, weekly, monthly, yearly would be fine for me.

Competition and standards

List of other products with similar/interesting/related features.

Here I would like to see some "editorial" content. How do our features compare to others?

CVS Doc section

This is where new features being developed and only in CVS are documented. When the CVS becomes RC/official release, the info in the CVS docs is transferred to update the official docs (FeatureXDoc).

Discussion/participation
