UserFile

General Description

Users can store personal files on a Tiki site. They can upload files and then download them when they want. A quota can be setup to control the maximum size of personal files per user.

Key Function and sub-features

- Shows portion of space allowed used
- Multiple uploads at once
- Description contains name, creation date and size, files can be sorted by any of those.

Typical Uses

Can be used to transfer documents between school and work instead of using email or floppy.
