

Clicking the **User Files** icon on the **Admin Panel** (see TikiAdminSettings) takes you to the User Files settings.

Configure User Files

The screenshot shows a web-based configuration window titled "User files". Inside the window, there are three settings:

- Quota (Mb)**: A text input field containing the value "30".
- Use database to store userfiles:** A radio button that is currently selected.
- Use a directory to store userfiles:** An unselected radio button followed by the text "Path:" and an empty text input field.

At the bottom of the configuration area, there is a button labeled "Change preferences".
