Hi there!

I just started with TikiWiki. My first installation is (going to be) a "free for all" site. You can see what it looks like by clicking [here](#). It's in Croatian language.

---

I'm also developing some modules and plugins.

- ALIGNEDBOX plugin is built on top of BOX plugin, with one additional parameter (tadah!) align so that text in aligned box looks very much like a sidenote in newspapers.
- last-artices module does exactly that: displays last published articles. I'm a little bit surprised that there was no such a module, so here's one.

Feel free to use them

They're also committed to CVS and will be available in version 1.8.

Ah, ah... I'm the 100th member of the Tikiwiki team 😊
