UserPageDragos

Hi, this is my firstattempt to do something with wiki... Basically I think this is very good, and once I will get along with it, I will try to help.

Good Work everybody!

I have some questions and maybe somebody will help:

1. The multi-site installation cn handle a COMMON user database?
2. The template system only allows the three oplumns layout? I have a feeling that can be anything but just want a confirmation...
3. Where can I find more information about Galaxia Workflow? I read the docs but I feel that this is a powerfull, maybe the powerfull tool here.
4. What is that VoiceTiki thing? Sorry if I sound dumb

Let me know if I can help in my turn.
