

UserPageflimflam

I currently help maintain a tiki site for a charity called [The International Community of Women with HIV/AIDS](#) on a voluntary basis. It's been going for close to 2 years now and is growing into a useful resource for the community.

Any help with designing a template for the site will be gratefully received.

Also help run a IT support company called [RunPCRun](#) where we support Windows and run all our backend on Linux (mostly LAMP)
