Big list, in no particular order: design, type design, interaction design, design theory, ethics, philosophy, literature, arts, information technology, education, sports, cultures, nature, human development, free software, peace, love and harmony.

Tiki!

I came across Tikiwiki a few months ago, while I was looking for open-source wiki, forum and cms systems to use in my master project. I was very happy to find out that Tikiwiki offers these and many more features...

Since then I have been working in building my web-site using Tikiwiki. Work is still in progress... as soon as the web-site is open to the public I'll post the link here.

I have also been reading a lot about free software and would like to get more involved and to contribute. Tikiwiki developers: if you need a designer (to make icons, themes, interface design, logo...), feel free to contact me, it would be a pleasure to help.
