

# UserPagemillette

homepage: <http://rym.waglo.com/>

I'm looking forward to get involved with misc. stuff: i18n, rss, wiki ([reStructuredText](#) anyone?) and determined to solve any bugs I encounter.

Totally unrelated to tiki - if you need any open source on CD in canada, let me know:

<http://www.waglo.com/nattor/>

Cheers!

P.S.: for lack of a better place to put this (I still have to familiarize myself with this site better), well, here's my short "todo" list.

bugs tiki:

edit

\*modif. mineur ne "stick" pas après "aperçu"

\*modif. mineur devrait etre automatique sous un certain seuil de modifs.

\*apres aperçu, je voudrais un piton "revert"

\*le test pour email est trop sévère

\*utiliser [reStructuredText](#) et/ou autres "markups" pour le wiki.
