## Tiki/Mindmeld Roadmap

### Phase I: Embedding Mindmeld into Tiki

My plan is to begin by simply embedding Mindmeld into Tiki as a module. This will allow the Tiki folks to start putting solutions into Mindmeld for user and even developer support.

*Timeline: Should be finished by October 24*

### Phase II: Mining Tiki for Answers

After I've embedded, I'll start looking at a database-level integration, so Mindmeld will be able to learn content directly from wikis, forums, articles, and other Tiki modules.

*Timeline: End of the year.*
