

# Tikiwiki with lessÂ fat

**First public release of tikilight is 1.8.2 see [ReleaseProcess182](#)**

TikiLight is the contraction for tikiwiki lightweighted. Here are the shell operations that are done from tikiwiki normal release :

---

```
find tikilight_$VER/img/avatars/ \ -type f -name '*.gif' | grep -v 000 | \ xargs -- rm -f rm -rf tikilight_$VER/img/custom find
tikilight_$VER/lang -type f \ -name language.php | grep -v "/en/" | \ xargs -- rm -rf rm -rf tikilight_$VER/lib/Galaxia/docs rm -rf
tikilight_$VER/calendar/iCal rm -rf tikilight_$VER/lib/pear/SOAP/example find tikilight_$VER/lib/pdflib/fonts -type f \ -name
"*.afm" | grep -v php_Helvetica | \ grep -v php_Courier | xargs -- rm -f find tikilight_$VER/templates/styles/* \ -type d | grep -v
elegant | \ grep -v moreneat | xargs -- rm -rf find tikilight_$VER/styles/* -type d | \ grep -v elegant | grep -v moreneat | \ grep -v
slideshows | xargs -- rm -rf find tikilight_$VER/styles/ -type f \ -name "*.css" | grep -v elegant | \ grep -v moreneat | xargs -- rm -
f
```

TikiLight can be good for testing or for upgrades in some cases.
