My TikiÂ Environment

- Windows XP Professional
- Intranet only
- Apache 2.0.48(Win32)
- PHP 4.3.5RC2
- MySQL 4.0.17-nt
- Tikiwiki 1.8

List of issues inÂ 1.8

In order of personal priority:

- PDF generation does not include images; it actually fails generation if a valid image link is included.
- GIF upload in image gallery does not create a thumbnail (works for JPG)
- cannot persist the change from GD to Image Magic in image gallery preferences
